### AutoCAD Crack

History Cracked AutoCAD With Keygen was originally conceived by Steve Sasson, who, together with artist and illustrator Greg Caporizzo, dreamed of a tool that would help them create architectural plans in a more efficient manner. (When asked how AutoCAD was born, Caporizzo responded "It is a project begun in 1976 that went wrong.") (see "The Story of the AutoCAD Demos" on the Autodesk Website) Since its first release, AutoCAD has become a de facto standard for architects and designers worldwide and is used in almost every aspect of architectural design. The first versions of AutoCAD were drawn with the help of a CGA graphics adapter in a modified Apple IIe personal computer. The initial version of AutoCAD worked only on the Apple IIe, and it was actually a modified version of an Apple II application called Draw. After a long history of development, AutoCAD was completely redesigned to make it more powerful and easier to use. Version 2.0, the first version of AutoCAD to use bitmapped graphics, was released in 1985. (See "AutoCAD from 1.0 to 2.0") Version 3.0 was released in 1988. Its most popular feature was a drawing palette that allowed the user to zoom in and out of drawings. (See "AutoCAD Version 3.0: The Drawing Palette") Version 3.5 was released in 1989. This version was the first version of AutoCAD to support 16- and 32-bit color modes. In 1991, an updated version of AutoCAD was released for the Macintosh. This version, known as "Version 4.0," brought with it such enhancements as an integrated Drawing Manager, a redesigned File Browser, new interactive commands, and a new drawing package format called DWG. (See "AutoCAD Version 4.0: A New Drawing Package") In the early 1990s, Microsoft's Windows 3.1 became the dominant operating system for personal computers. Microsoft has since supported and enhanced AutoCAD across all of its products, beginning with Windows 3.1 in 1991. (See "AutoCAD under Windows NT") AutoCAD's popularity increased with the rise in use of the Internet in the 1990s, and the software was downloaded online more than 50 million times by early 2000. AutoCAD on the Web was introduced in 1999.
