\* Discover, Clean and Protect your PC, your Network and your servers, even your Applications! \* D... Best Phishing Protection for Business The Kaspersky Lab network has been scanning the Internet for the presence of the new Trojans, viruses and worms in their final development stages. We have detected their latest developments in the form of "ready to download" full versions of sophisticated Trojans such as "AD.Skipper" and "Henkaku". We have also detected several Malware update samples that are not yet full versions. One of them is entitled "KillDisk\_B.A" that runs on Android phones, and this operating system is used by malware developers to create their own malware. A big part of the latest viruses and Trojans is highly-expressed Android apps, which means that running an Android phone as a "Trojanized system" is a common method used by cyber criminals to distribute malicious code. The Kaspersky Lab antivirus product will detect and disinfect all known Trojans and Viruses once it is downloaded. But in order to prevent the spreading of mobile malware it is highly recommended to install Kaspersky Mobile Security 2015 on your Android smartphone. In addition to cleaning such threats as viruses, Trojans and worm, Kaspersky Mobile Security 2015 protects your Android device from such mobile threats as spyware, rootkits, key loggers, and even malicious apps. Kaspersky Lab is aware of the risks of user-controlled gaming machines. However, if a single gaming machine is used for playing games and carrying out banking transactions, then it is unlikely that bank account information will be stolen in the event of a cybercrime. # # # Kaspersky Lab is the world's largest vendor of security solutions for consumer, business and government users. The company's portfolio includes more than fifteen popular security solutions ranging from consumer desktop and laptop security to Network Security for SMBs and Enterprise customers, mobile security, cyber training for corporations and government agencies, and powerful new Internet security products. Kaspersky Lab provides organizations of all sizes with the most effective security technologies: Anti-Virus, Anti-Spyware, Anti-Spam, Password Manager, Email Security, Internet Security, Anti-Phishing, Network Security, Web Security, Cloud Security and Safe Harbor. The company's proactive approach to emerging threats is unique in the industry. Kaspersky Lab's customers enjoy

### What's New In?
