Portable Efficient Password Manager

Efficient Password Manager is a password manager and secure note taker for Windows. It runs as a transparent portable application and can be easily moved to a USB drive or PIM. Entry: Add new item. Make sure to choose a folder under Start Menu (ex: C:\>), then the "Click the "New" icon." Select "Shortcut". Type a name. Choose a folder under Start Menu (ex: C:\>), choose "Create Shortcut Here". Choose "Shortcut Type". Pick "Application". Select a "Program" (ex: notepad.exe). Choose "Target" (ex: "C:\>epm.exe"). Select "Click the "OK" to Finish" "Action". Type a comment. We are proud to present you with Efficient Password Manager Portable 2.1, the second release of the application that is a standalone version of our Efficient Password Manager Windows software. With this update we did add several improvements, but the most important changes are as follows: 1. Fixing a major security hole that had been discovered in Efficient Password Manager. Since this was a major problem, we decided to bring Efficient Password Manager Portable 2.1 with a clean installation, and ask all

users of the previous version to uninstall it. However, since the license was not updated, we made Portable 2.1 Free for all users. 2. Portable version now starts without asking to enter the EPM settings. 3. Fixed a small problem that caused EPM menu to not show up in right-click context menu in Windows Vista. 4. Made Portable version compatible with Windows 95/98/ME (the older Windows versions will work fine though, but we had to make a slight change in the installer package). 5. Fixed a problem in Portable version that would prevent adding a new folder. 6. The right-click menu now shows "Portable Help" when EPM is running from a removable device. 7. Fixed a problem with the context menu of the item (e.g. Add New Item, Cut and Paste, Backup...) in Portable mode. The items would not work. 8. Updated translation files. 9. Code optimization and memory usage improvement. 10. Reduced EPM registry keys. If you would like to read the full changelog, you can do so on our Web site. If you use Portable EPM, we would appreciate it if you could send us 6a5afdab4c
