For crystal reports version Q: How to detect that a table is in a report? I have a master page of a report, and I am using a table to display some data. The `tb_TABALABEL_ID` is the unique ID I used to add the table into

---

the report. This table, when it is not in a report, is created with a query like this: insert into tb\_tablabel(tb\_TABALABEL\_ID,tb\_LUZERIGA,tb\_LUZERIGA,tb\_TIPO,tb\_CODIGO,tb\_NOMBRE,tb\_NOTA) values('' & CStr(ID\_TABLA) & ',' & CStr(txtLUZERI.Text) & ',' & CStr(txtLUZERI2.Text) & ',' & lv\_TIPO.SelectedValue & ',' & lv\_CODIGO.SelectedValue & ',' & txtNOMBRE.Text & ',')

How can I know if the tb\_TABALABEL\_ID that I am using to create the table is in the report or not? Because the logic of the code above could be wrong, so I have to add a check. A: The short answer: No. The only way to know if a table is in a report is to query the report's dataset and get the

---

table by its name. The query must make sense when the report is executed. The longer answer: If you want to know if a specific element is part of a report or not you'll have to know the details of the report rendering itself. If the rendering is done via the query editor (webparts, external editors or the report engine
