It packs enough features to make the entire process easier by simply adding notes with a single key press. Speccy is a smart tool for system analysis. It consists of many useful features that allow you to check drivers, hardware and even configure your windows settings (including your screen, keyboard and mouse). The interface is easy to use and includes simple questionnaires that make your job even faster. It's a neat and powerful application and if you are looking for something more powerful, you should try Speccy Lite which is a limited edition. Speccy is completely free so you don't have to worry about viruses and similar problems. You can install Speccy directly from the Internet and the download size is very small. When you choose the download option, be aware that there are often multiple versions. Don't be surprised by this because there is a reason for this. There are many third-party developers who create additional versions of Speccy. These are only available for a limited time and they might ask you for a small amount of money. You are free to delete all downloaded files and start the download process again. Be careful with this as some of these files are bundled with other software. If you already have Speccy

### What's New In TastenTrick?

Just like the name suggests, the TastenTrick is a small utility that lets you add text notes directly on your desktop. The interface is simple and basic; you cannot customize it or control it in any way. All you have to do is click somewhere on your desktop to enter the application, then write down your notes and click anywhere to exit the program. If you like, you can choose to add the note on a background image. The app also allows you to save the notes as HTML files on your desktop. Unfortunately, TastenTrick doesn't include many settings to modify the functionality or interface; in fact, the tool is already set up with all its built-in features. The app is very easy to use because you have just a window to enter a note. To export the note to HTML, just hit the "Ctrl + Del" keyboard shortcut. The app has a built-in search engine that allows you to search the Internet or on Wikipedia. This application is quite useful if you want to use it as a personal assistant. It's very easy to use and it definitely becomes a must-have if you're often surrounded by computers. This application allows you to write your notes directly on your desktop background, so you'll never have to worry about messing up your monitor. Of course, it's also easy to use and offers too many features to mention. You can write your notes in various sizes, add special effects and a background image. If you share your notes with others, you'll be able to choose a custom font, among other options. This app is the simplest way to write notes on your PC as it allows you to work directly on your desktop. You don't have to deal with a separate window, which is especially great when you're working on your PC in the bathroom. No fancy graphical interface. This is a simple tool that allows you to write or type down
