software allows
you to set your
tasks to be
completed each day
by using a timer.
By pressing on the
timer that appears
when you move your

cursor over the name of the task you can add it to the 'Due Today' list of your tasks. You can also remove tasks from your list that are not important to you or completed by using this feature. By

pressing on the
'Sort' button next
to the timer, you
will be able to
switch the tasks
on the 'Due Today'
list to be
displayed either
alphabetically or
chronologically.

It is also
possible to drag
tasks and even sub-

tasks to different categories using the 'Drag & Drop' feature. You can also add any event to your calendar (or simply view it on the spot if the 'Events' is checked on the 'Other' tab of the task). This software also

Less than a month

ago, a research team at Boston University has released a new mobile app to track things in real time:

YouTrack. The YouTrack app for Android and iOS was developed by the BU Media Labs and is an app that

allows users to monitor their work in progress, to record bugs and feature requests, and to get suggestions for the next version of the product. The app can be used to track any project, whether it is an internal

project or an open-source project.

The application is free and

compatible with devices with

Android version

4.1 or above and

iOS 8.0 or above.

This new project

for Android and

iOS has already

taken a

considerable
number of users to
this day. Since
its release, this
application has
experienced a
quick, positive
reception. It is
now available on
Google Play Store
and Apple iTunes
Store for users to
install it on

their smartphones.
App Description
Project management
apps have emerged
to address the
challenge of
tracking projects
and managing tasks
in real time. This
project management
app is designed to
monitor tasks and
projects while

working and
developing
software. It
integrates with
your Google Drive
and Dropbox
account to enable
you to track
projects and
tasks. It can
integrate with
your existing bug
tracking software.

Its intuitive interface allows you to view your task information, assign tasks, share files, collaborate on task information, and generate reports. View your tasks as a list or in a calendar view Watch as your

tasks are tracked

What's New In TeamViz?

Work tasks or
important events
organized and
easily retrievable
is a goal for many
users and in this
respect one of the
numerous
applications

created for such purposes can certainly be of assistance.

TeamViz is a software solution that uses the well-known Pomodoro technique which will help users manage their activities as efficiently as

possible. Organize tasks from a clean and practical interface As soon as the program is installed and started, the nice GUI will greet you and enable you to add new items to the daily list immediately. The main window

features two main areas, one in which are displayed details regarding the current date, number of tasks and Pomodoros achieved and another where under 3 columns all the activities are kept. Create

and edit tasks,
synchronize them
and get detailed
reports on the
spot TeamViz
prompts you to log
into an existing
account or create
one on the first
run, so you can
have all the
events kept at
hand. By simply

typing in the task name in the first column you will have it included in the currently selected list. To add the activity to the category of those that are due today, simply press the small timer that appears when hovering the

mouse cursor over the task's name. Moving items to the 'Unplanned Tasks' area and vice versa is possible through simple drag and drop operations. After adding several tasks during the course on one day, you

might want to have them synced and you can do this with one click. Those interested in statistics have at their disposal the 'Report' module, where according to the selected date range one can view the completed and

discarded
Pomodoros and
detailed task
information for
each entry. An
time-saving
organizer for
daily activities
To sum things up,
it's safe to say
that TeamViz
succeeds in
providing a means

of keeping track
of multiple tasks,
which can increase
productivity and
also save lots of
time for users who
want to become
more methodical
and efficient in
their work.
