Keyboard Shortcuts Many of the shortcuts described here are available in Photoshop CC (2015) and are represented in this handbook by "CC" throughout the text. Photoshop CS6 shortcuts are not represented but can be found here. Photoshop CS7 shortcuts are similar to Photoshop CC and are represented in this handbook by "CC" throughout the text. Photoshop CS6 shortcuts are represented in this handbook by "CS6" throughout the text. Photoshop has more than 50 tools for editing images. These tools enable you to change pixels, change colors, blur backgrounds, and crop photos. The keyboard shortcuts apply to both Photoshop's image-editing tools and all Photoshop tool palettes. Photoshop also has a number of standalone tools for things like converting images to black-and-white, combining images, and extracting objects. Here are the shortcut keys to Photoshop's most useful commands.

Camera Raw Shortcut	Command/Shortcut Key	Description	function key/function key	Description
Command or shortcut key Tab ()		Selects the next tool in the active toolbox	Command or shortcut key K	Removes the last object added to the active layer
Command or shortcut key 0		Undos the last action that was performed	Command or shortcut key Y	Yes (to confirm)
Command or shortcut key Enter ()		Toggles the visibility of the current layer	Command or shortcut key /	Pinches the image outwards
Command or shortcut key -/		Pinches the image inwards		These options are in the upper left of the active workspace window. They appear only when you move the cursor to the left on the workspace. Use the Photoshop workspace

The workspace is where you manage Photoshop's tools and palettes. You can open different toolsets for different projects and explore them as you work. To open the workspace: Option + space bar (Windows)/Command + space bar (Mac) 1. Switch to the Browsing and Viewing workspace. The Workspaces panel opens with this option. 2. Select the Photoshop workspace from the Workspaces panel. 3. Switch to the Photoshop workspace. The Photoshop workspace is organized into different toolboxes (tool palettes). This section shows you how to open these toolboxes. Open the Snipping Tool Shortcut key/function key Description Command or shortcut key Ctrl + Y Selects the next tool in the active toolbox Command or shortcut key Shift + P Adds a new active-layer mask on top

Q: Sorting a list based on the sum of sub-lists I have a list (a list of lists) whose contents I need to sort based on the sum of the contents of the sub-lists of each element. The sub-lists are guaranteed to be of equal length and the sum of the sub-lists of a given element should sum up to 1. Example: [[[3.8, 0.0, 0.0], [3.9, 3.6, 0.0], [0.0, 2.3, 0.0]], [[5.0, 0.0, 0.0], [0.0, 0.0, 0.0], [3.0, 0.0, 0.0]], [[0.0, 0.0, 0.0], [1.0, 0.0, 0.0], [1.0, 0.0, 0.0]], [[1.0, 0.0, 0.0], [1.0, 0.0, 0.0], [1.0, 0.0, 0.0]], [[6.7, 0.0, 0.0], [0.0, 2.3, 0.0], [3.0, 0.0, 0.0]]] In the example above, the list should be sorted based on the sum of the first element in the sub-lists. The problem seems to be that I have no clue on how to do this. Any help would be appreciated. A: You can sort the sub-lists, then look up the sum of the first element. list = [[[3.8, 0.0, 0.0], [3.9, 3.6, 0.0], [0.0, 2.3, 0.0]], [[5.0, 0.0, 0.0], [0.0, 0.0, 0.0], [3.0, 0.0, 0.0]], [[0.0, 0.0, 0.0], [1.0, 0.0, 0.0], [1.0, 0.0, 0.0]], [[1.0, 0.0, 0.0], [1.0, 0.0, 0.0], [1.0, 0.0, 0.0]]]

Our Research with People We are not only researchers, we are also clinicians and service providers. As a result, we design, plan, implement and evaluate research projects and clinical programmes in multiple institutions throughout Australia and internationally. All of this work is motivated by our belief that improving the lives of people with disability is a shared responsibility and that the best way to do this is to bring together different approaches and resources to find solutions. Our Accommodation Programme We have an Accommodation Programme based at the University of Queensland. We help students to find affordable housing for their studies, and assist them to make use of free, subsidised or low cost housing in the wider community. Our research faculty has a long history of supporting people with disability, dating back to the late 1980s. In the late 1990s the support of the University of Queensland for its work in research with people with disability became formalised through the creation of a Special Research Centre with a broad remit of disability research. The Centre was funded by the Australian Research Council until late 2011. In 2011 the Centre was merged with the University of Queensland's established Outreach and Engagement (O&E) program and the research staff have successfully developed it into a National Centre of Excellence within the National Disability Service. The Centre is known as the Queensland Centre of Excellence in Disability Research (QCEDR). We also work closely with the Queensland University of Technology (QUT) and the Queensland College of Social Workers (QCSW) in this area. Disability and Critical Thinking We are engaged in research on disability and critical thinking. A recent publication was 'Disability and Critical Thinking', a book edited by Professor Robin Waring and Associate Professor Carol Rose, and published in 2013. Social Work and Disability From the perspective of social work practice with people with disabilities, Professor Waring's work has been extensively reviewed in an Australian School of Social Work journal article entitled 'From theoretical understanding to clinical practice: Advancing the practice of social work', and in the book 'Advocacy in practice'. Q: Whats the difference between a light bulb and a glass bulb? For a similar reason, I have a question regarding plain wires. Is the difference between a plain wire and a glass wire that the glass is used for an insulated one? If so, how is it insulated? I am thinking that the insulation comes from
