FIFA 20 introduced player-driven micro-replays. FIFA 22 introduces 'HyperMotion Technology.' FIFA 22 will feature groundbreaking real-life player motion capture data and post-match player performance analysis to provide the best player-vs-player and team-vs-team interactions ever seen in FIFA. The game will be powered by sport's first ever next-generation engine, which will provide the most authentic and realistic physics model to date. FIFA 22 is the most technically complex and complete game in the FIFA franchise to date and will enable millions of FIFA fans to experience sports-like precision and control for the first time in gaming. FIFA 20 introduced new ways to impact the game through customizable player attributes and gameplay styles. Players can now completely change their on-field behavior by selecting between Overloaded, Aggressive and Balanced gameplay styles. "Balance" gameplay allows players to alter their play style based on their individual preference. FIFA 22 gameplay will be powered by the next-generation FIFA Ultimate Team card game engine, FUT Champions. The changes will enable unprecedented real-life ball physics, ball control and accuracy while also improving ball size and weight. Player models are enhanced in FIFA 22. FIFA 21 introduced "Professional Anthem," which allows players and fans to customize the music soundtrack, as well as create their own signature end song. Players in FIFA 22 will be able to improve their game in multiple ways, from training to free play. For the first time in a FIFA game, FIFA Ultimate Team will be included in the game. FIFA Ultimate Team is free-to-play card game in which players must build and manage a team of players and get them to the top of the player card pyramid. In addition to the new look for pitch, FIFA 22 will include enhanced face paint technology and automatic, intelligent and accurate goalkeeper interaction. This technology will improve goalkeeper and player ball control and optimize goalkeeper movements so the goalkeeper can make incredible saves. In an effort to improve the overall experience for both players and fans, the game will also feature enhanced FIFA TV and new statistics. FIFA 22 will feature improved goalkeepers and teams. The next generation VFX engine brings new goalkeepers and teams to the franchise. FIFA 22 will provide players with a deep insight into the attacking moves of their opponents. New off-ball analysis tools allow players to measure the

Ultimate Team brings a host of new features to the franchise, including card collecting, manager trades, and improved training. Build the perfect squad by tinkering with players, attributes, and other items; make trades with other players to bolster your squad; pick a manager; earn more stars by playing well and competing in games; and win the ultimate

rewards, including coins, player packs, and more. Ultimate Team keeps the fun of FIFA and gives you more ways to play, customize, and compete. VAR FIFA 22 introduces a new control scheme for the Video Assistant Referee and the unique and engaging VAR sub-system. For the first time in a FIFA game, VAR is not restricted to the penalty area. VAR's new per-game Decision Review System will take you right into the action for a more true-to-life experience. MATCHMAKING FIFA 22 introduces a number of new matchmaking improvements that will make your games more enjoyable, including a new Match Type, Daily and Weekly Leagues, and improvements to the Friendlies feature. GAMING EXPERIENCE WITH THE NEW ENGINE EA SPORTS Football Club improves gameplay for both players and spectators with its next-generation Frostbite engine. Every player, pitch, and stadium in FIFA has been rebuilt for better authenticity, with lighting, weather, crowds, and stadium atmosphere all animated for spectacular views from any angle. The new Frostbite engine allows for greater visual fidelity, improved animations, and a more lifelike character set with hundreds of thousands of new animations. INTERACTIVE FACILITIES AND THIRD-PARTY ENGINE All of the new features in the Frostbite engine are brought to life with the additional use of the Frostbite Player and Goal Objects, an engine-supported 3rd party library of virtual interactive objects. These virtual objects, commonly called "Player Objects" or "Players," can be placed on the pitch and in your stadium, while the Physics engine continues to simulate movement of the players and the ball. Addressing the greatest frustration of video games and the most frequent complaint of sports fans today - the lack of on-pitch interaction - we have enabled players to interact with these virtual objects as if they were genuine. The new technology brings FIFA into the 21st century, redefining how fans interact with a game. MID-JOURNAL STADIUM TRANSFORMATIONS FIFA 22 introduces the "transformational
