Plots for $H\beta$ (top panel) and $H\gamma$ (bottom panel) for the composite population of the Magellanic Clouds (top panel) and the LMC (bottom panel). $H\beta$ appears to be a marginally better metallicity-sensitive index, but the effects of rotation are much larger for $H\beta$ than for $H\gamma$. More detailed plots are available from the on-line edition of this paper. =0.5em FIG. 8. Plots for $H\beta$ (top panel) and $H\gamma$ (bottom panel) for the LMC. Rotation, stellar age, and metallicities for each SSP are shown, but effects of IMF, metallicity, and rotational velocity are not included. FIG. 9. In most cases, one parent will make the dinner, and the other parent(s) will order something from a delivery or convenience store. If we're not careful, we can spend half the meal (if not more) wondering what the others want to eat. For families with more than one child, it can be tougher to order a meal that is well-rounded enough to please the picky eaters, but still not too much for the "regulars." That's where gluten-free dishes come in. If you love pizza and the addition of gluten tends to make that dish a bit too dense for your taste, adding gluten-free soy sauce or gluten-free margarine can make it more appealing to the picky eaters. On the other hand, if your favorite dessert is gluten-free, you can easily make it more kid-friendly by swapping out gluten-based ingredients for a different protein like rice or nut butter.
