Risa...Tachibana..STAR-418... October 4. Â·
KennethBridger / Â· brdocro999 / Â·
kenbridger / Â· . README This is a Monte Carlo
simulation of a random number generator. It
may be used to generate a suitable random
number..... Monte Carlo Monte Carlo
simulation is based on the well known
principle of random samplers. This principle
works on an ensemble of infinite uniform
random samplers. When a Monte Carlo
simulation is set up, a much simpler random
number generator may be set up instead of
generating a uniform i.i.d. random number. . .
. Random Number Algorithm RoaRandAlgo.cpp
is a Random number algorithm, where the
state is consisted of two parts: the internal
state and the input state. The input state
controls the output state. . State The internal

state is a positive integer. As the state changes, the internal state is reflected in the output state. The internal state is only used during the process of Monte Carlo. This program is freely available. The project site contains a license file..
