### CleanMOCache Product Key Full

Cracked CleanMOCache With Keygen is a useful little program that enables you to clean up privacy information, tracks and other related data when it comes to your web browsers and Windows tools. It offers support for Netscape, Firefox and Opera. The interface of the application is based on a common window with an uncomplicated layout; you can navigate through the tabs and input your options. For example, you can clean the cache, history, autocomplete details, cookies, saved usernames and passwords, along with typed URLs of web browsers. Furthermore, you can manage Firefox and Opera cookies, profiles and login credentials, and clean Mozilla items which automatically run at system startup/shutdown. Concerning Windows tools, you can clean recent documents, Run and Search history, MRU Registry entries, the Recycle Bin and Clipboard, along with the user temporary directory. But you may also delete unnecessary data from Windows Media Player, WordPad and Office apps, along with items which automatically run at system boot. It is also possible to create a custom list of files, directories and Registry entries to delete. Once all your preferred options have been set up, you can run a complete cleanup procedure. Plus, CleanMOCache creates log details and can be minimized to the system tray; thus, it doesn't disturb your activity on the computer. The software tool has a good response time, quickly completes a scan and clean job, and requires a pretty low amount of CPU and system memory to work properly. We have not come across any issues throughout our testing; CleanMOCache did not hang, crash or pop up error notifications. However, the app has not been updated for a very long time (e.g. doesn't offer support for Chrome or Safari). Nevertheless, thanks to its intuitive layout yet wide range of configuration settings, CleanMOCache should satisfy the entire audience. Compatible... Welcome to the ShareMe.
