MacAdware 03.08.2013 16:23 Moreover, once users get infected with this adware, cyber attackers will use.It is proposed to develop an experimental model for gingivitis and periodontitis in humans using a sterile wound (incision) on the palatal gingival tissues that continuously bleeds and becomes secondarily infected (pathologic calculus development). The palatal wound will be made with a small periodontal elevator or with a scalpel on about 4 weeks old mini-pigs. The procedure is repeated weekly, and the resulting gingivitis/periodontitis is evaluated and graded in the same manner used in human dental patients. At the end of the experimental period of 4 months, animals are sacrificed and the gingival wounds, surgical wounds and teeth and surrounding tissues (oral tissues and teeth) examined
