Adobe Photoshop Elements, a powerful alternative to the professional Photoshop. Unlike a professional version of Photoshop, Elements is less demanding. Therefore, you can use it more comfortably and for less time. Even though it is used by less professionals, you will probably also use it and get more out of it than ever before. If you have Photoshop CS or above installed on your computer, you can start using Elements on your computer.

If you don't know anything about Photoshop, and you want to be able to use Elements, we recommend that you install the Pro version and then, once you have mastered Elements, learn to use Photoshop. Hello and welcome to the beginner's guide to Photoshop Elements. In this post, you will learn everything you need to know to get started with Photoshop Elements 10 and above. You will also learn how to use the basics of Elements and do some cool editing tricks. It is recommended to learn to work with Elements first and then, once you get the hang of it, switch to the professional version. 1. Elements 10, 11 and above The current version of Photoshop Elements is 10.0. This is the last version with an option to choose the Basic or the Standard version. High concentrations of soluble corn protein enhance ruminal protein synthesis, energetic value of diet, and diet digestibility in beef steers. This experiment tested the hypothesis that increasing the level of dietary soluble corn protein (SCP) would increase ruminal protein synthesis (P), efficiency of protein utilization (Rp), and energetic value of a diet in beef steers compared with diets with similar CP and NDF concentrations but lower SCP contents. Seven Holstein steers (328 +/- 2 kg of BW) were housed individually and were fed an untreated 40% CP and 23% NDF corn silage diet (CON) or the same diet in which 45% of dietary CP was replaced by SCP (SCPD) at two SCP concentrations (45% or 85% of dietary CP). The diets had the same CP and NDF concentrations of 39.4 and 31.3%, respectively. Diets were isoenergetic. Block design, Latin square treatment was used. Dietary treatments were assigned to steers on d 0. All experimental periods were 31 d. Dietary treatments were fed at 12 and 6% body weight/d (d 0 to 14 and 15 to 31, respectively), based on the regression model: diet level of SCP = -.060 +.999 (15 to 31, d; R2 =.98). Dry matter (DM) intakes of SCP diets were 32 and 30% greater than for CON diets (P

Fahrenheit 9/11 An attack that has become a defining line of thought in the international left has just been unveiled. After years of frustration and indeed paralysis at the sight of the Bush administration proffering American exceptionalism as the explanation for the Iraq conflict, the left has decided to fire back, using the same allegations to take on American politics and the media as a whole. Led by Jeremy Scahill and others at The Nation, this has resulted in the publication of an open letter (via HuffPo) which has now been signed by many more prominent antiwar writers and activists. This publication responds to the: What Colin Powell said, and did Why that's a

lie Why his speech was important The Fallujah precedent Israel is a fascist state The Iraq Study Group The Iraq War and the antiwar movement The War is Over The US has never been and never will be the great liberator Is the US really the greatest country in the world? How the media has covered the Iraq war The Washington Post and the New York Times Journalism is worthless The propaganda russia is the great evil Why we should watch what we say The crucial questions Colin Powell: Zionist or hypocrite? The NATO attack on Kosovo, the US role in it The North Korean Dictatorship How the CIA kills people How the CIA sponsors terrorism Stalin was worse The Left and US foreign policy Why the Reagan doctrine is the gospel of the neocons How we got Saddam The William Crain letter I'm not going to go through this list in detail, but in general terms it simply suggests that the war in Iraq was not right, that the US is not a great country, that it has never done any good in the world and that the media has done nothing but lie about it. As one might expect, it carries with it the usual total contempt for American nationalism, speaking of it as "a myth," clearly implying that there is some other, better America, of which the US is not a part. The whole stance has to be taken with a large grain of salt, not least because all the signatories are far too close to the subject to have a completely detached outlook. But it is certainly interesting to see someone call for the rise of a new
