God Of War Collection Volume 2 Fix 355

My Life in Pictures. God of War Collection Volume 3 Fix 355 Who. Hearts. God of War Collection Volume 2 Fix 355 God Of War Collection Volume 2 Free Download Category:GoguryeoQ: Javascript loop to add values to a field/object I have an object that I want to loop through to add key value pairs to a key in an object. So: var object = { foo: 0, bar: 0 } I want to add key value pairs from another object like: var data = { foo: 1, bar: 0 } The problem is, my object starts at 0 instead of 1, and I want to be able to loop through the data object and increment the numbers. So it should be something like: for (var i in data) { object[data[i][0]] = data[i][1] } Any suggestions? A: Use Object.assign() The Object.assign() method returns a copy of the object whose properties have been included on the right-hand side of the assignment. var object = { foo: 0, bar: 0 } var data = { foo: 1, bar: 0 }; for (var i in data) { object = Object.assign(object, data[i]); } console.log(object) Alternatively if you want to avoid copying the objects, just use Array#concat() The Array.prototype.concat() method returns a new Array containing the elements of the calling array followed by the elements of the specified array. var object = { foo: 0, bar: 0 } var data = { foo: 1, bar: 0 }; data.concat(object); console.log(object); Wikileaks Will If I Run - peter123 ===== briansmith This page links to someone else's comment.
