Map Installation: Changelog added on 2015/07/19. The following changelog was added: 1. Updated some half-mile waypoints for Ice Age and New Hampshire. 2. Fixed the issue that prevented the original map pack from installing. Unfortunately, the total size of the data pack increased slightly, and now requires a 46 MB download. :(. Map Installation: Changelog added on 2015/06/19. The following changelog was added: 1. Fixed the issue that prevents the original map pack from installing. Unfortunately, the total size of the data pack increased slightly, and now requires a 46 MB download. :(. Based on feedback from users, I've reduced the file size of the installer to only load the exact portion of the map pack that you need to play the game. This version of the maps installer should also fix the issue that the installer used to download all map data from the internet, including the old map pack data and future map pack updates. However, you can still update the map pack from a link on the installation page, and both versions of the installer should run at the same time. This version of the installer also fixes the issue where running both versions of the installer would cause a third party firewall to keep prompting the user to allow access to the file transfer. New Free HD Maps are available for download in our Community. Please follow the Installation Instructions to download and play these new maps: 1. Ice Age - Community Map (HD Version) - by shawnvexpot Why is the map pack over one million miles large? As with previous map packs, our maps are downloaded from the internet and then installed onto the game. This requires the game to make remote connections to both the map data as well as future updates as they become available. This is why the map pack usually ends up being over one million miles in size. Sec8eF588b
