

SmartView 4K is the worlds first full resolution rack mount Ultra HD broadcast monitor with 12G-SDI for native display of up to 2160p60. You get a professional broadcast monitor that supports the latest Ultra HD resolutions, plus automatically switches to SD and HD-SDI formats using high quality Teranex processing for a clean and professional display. The machined metal design includes a built in control panel for using features such as the built in 3D LUTs, H/V delay, blue only, zoom, focus peaking, customizable frame markers and more, either from the front panel or via external Ethernet! SmartView 4K supports VESA mounting so you can install on articulated monitor arms or rackmounting. SmartView 4K delivers amazing picture quality in an incredibly thin lightweight design. The super bright LCD screen looks great from any viewing angle and, because the controls are all digital, your settings wont change or drift over time. You can even load custom 3D LUTs for monitor calibration and on set viewing! When monitoring SD or HD signals, the built in Teranex processor uses advanced patented and proprietary PixelMotion algorithms to automatically de-interlace and scale video up to Ultra HD resolution. That means you get visually transparent, artifact free scaling for the best quality possible and a fluid smooth viewingexperience! Now you can install the perfect future proof monitoring solution because SmartView 4K will handle monitoring from all your SD, HD-SDI, 3G-SDI, 6G-SDI and 12G-SDI sources. The SDI inputs automatically detect the input video standard and re-clock instantly. The full resolution Ultra HD monitor allows you to see every single pixel in a 3,840 x 2,160 resolution SDI input, even when running at a faster 60p frame rate! The fast frame rate support is perfect for fast motion such as sports, plus you get a totally future proofdesign!

#### Smartshow 3d Full Version Free 102

the system of full version includes a new interface, main window, preview window,system window, tools window, 3d window and so on. it improves the performance of the computer system, especially the speed of your 3d game. it supports all video card without problem and all types of windows. main features: - working as a stand-alone app, or as a plugin for other apps, such as, max, kdenlive, blender, maya - view scene from the viewer's point of view - full version of the software is free, with no limits, no purchase, no time limit and no trial period - the full version can be downloaded from the website ( /> - supports all major 3d softwares, such as: blender, 3d studio max, maya, cinema 4d, softimage, sketchup, 3d studio, unity3d, and many more! - the software runs on all major pc platforms, such as: windows, linux, mac os x and on android devices. smartshow 3d free version: this is the free version of smartshow 3d, which offers you an overview of your audio environment. this is also the first stage in the audio analysis process. it can detect the number of sources and channels, as well as filter and equalization settings. smartshow 3d is a plugin for the wtm-windows sonic tools 2.0, designed to be the best way of knowing where your microphone is situated in a room. your preferences are saved in the wtm-windows sonic tools presets. an audio analysis is then conducted. the quality of the analysis depends on the microphone and the signal. the results are shown on the smartshow 3d main window. they can also be saved in a wtm-windows sonic tools preset. 5ec8ef588b
