WindowCam Recorder is a lightweight free screen recorder and PC video editor. It allows you to capture and record any applications windows and it allows you to capture any videos in the background and use the recordings in any other applications. The interface is intuitive and user-friendly. ScreenPoint Recorder is a well-known free recorder that has no automatic video export options, no built-in sound recorder, and only simple editing features. It nevertheless offers the most options for filtering and masking. You can limit the area of the screen that is going to be recorded and draw any shape on the live recording. This way you can record everything in the application window including window animations, controls, and context menus. iSpy video recorder is a free app for the Mac that is best when you need to record mobile or PC screen. Its easy to use as it comes with a handy screen capture feature that can capture anything in the screen. You can limit the area of the screen or just the active window and lock the live video preview. iSpy has a vast library of images, videos, and effects that you can apply to your recordings. OSX Screen Recorder is a free screen recording and streaming app for Mac that allows you to record your desktop with or without a mouse, capture audio, and have the option to share via Twitter, Vimeo, or Dropbox. It can also turn the recorded screen into video files that can be used in any other apps. It's an easy-to-use video editing and screen recording software that won't spoil your footage with unsightly watermarks. If your work entails text-to-speech, screen capturing, video recording, and voice recording, there's no need for additional software as Ezvid houses it all. It is a proprietary movie maker tool geared toward professional touch with cutting-edge features. The software's outstanding features include real-time drawing, narration recording, playback speed control, voice synthesis, and webcam implementation while screen recording.
