### **Filter Gallery**

This is a great thing to learn within Photoshop. It's a collection of extremely powerful effects that you can apply to your images just like you would with presets in Lightroom. You can find them in the Filter Gallery under Filters > Filter Gallery. This is where you'll find plugins including Linear Light, Soft Focus, Bokeh, Gradient Glow, and Screen. Here's where you'll find some of Photoshop's best ones as well — like Wave, Pen, Paper, Dirt, and Toy. **History Panel**

This is a window that shows you all of the editing you've done on an image. It looks a lot like the one from Lightroom and you can use it almost exactly the same. Press the number keys on your keyboard to flip through your history and use 'h' to hide them. You can click each layer to expand it so that you can see a breakdown of the changes. You can also double-click a layer and have Photoshop automatically remove the layer by itself. This is super helpful if you're a beginner because it'll help you learn how a layer is used in Photoshop. **Keyboard Shortcuts**

This gives you all of the shortcuts you'll use, including 'ctrl' for image transformations, 'alt' for interacting with layers, and 'shift' for accessing Playback and information. Conclusion: The Merriam-Webster definition of a move: to place (a person) in someone's place. In other words, it involves making two people go in two different directions so they end up in the same place. e3d0a04c9c
